

Twin Home Buyer Inbound Call Flow v2.0

Every inbound call, from the third ring to a named ending. Built to be reproduced node-for-node inside Retell AI Conversation Flow.

SUPERSEDES v1.0	BUILD / RETELL IMPLEMENTATION [CURRENT BUILDER]	APPROVE Juan	STATUS Draft for approval
---------------------------------------	---	------------------------------------	---

One rule governs this document. A **Transfer Call** moves the live caller. A **Send Notification** moves information only. Gen is a transfer destination. Sabelli is a notification and review recipient — there is no transfer node for Sabelli anywhere in this build.

Twin Home Buyer · Retell AI Conversation Flow build specification · Supersedes v1.0 · Every branch terminates in a named ending. Gen is a transfer destination; Sabelli is a notification and review recipient.

01 What changed from v1.0

Two routing corrections drive this revision. Both are drawn below before anything else, because a builder who gets only these two right has fixed the errors that mattered.

#	AREA	V1.0	V2.0
1	Realtor / agent routing	Realtor → Mariaelena	Realtor → GEN (X2 → T9 / T10)
2	Sabelli	Treated as somebody callers could be sent to	Notification and review recipient only , on approved T22 cases. No transfer node exists.
3	Legal / agency / mailer	Mixed into normal qualification	Isolated global layer G-LEGAL / G-MAILER → T22 → Juan + Sabelli
4	DNC	Handled ad hoc	Global node G-DNC → T21 , sets dnc_requested = true
5	Endings	Some branches ran out without a disposition	24 named endings, every branch terminates
6	Build owner	Build: Seth	Build / Retell implementation: [CURRENT BUILDER]

Retired ending IDs. T7 and T8 were the v1.0 realtor-to-Mariaelena endings. They are retired, which is why the realtor branch now ends at T9 and T10.

02 Legend

Six node styles, matching the Retell build. Shape carries the same information as colour, so the flow still reads if it is printed in black and white.

BLUE Conversation and action nodes — what the AI says, and the records it writes. Retell: Conversation · Function	DARK Decision nodes. Every exit is labelled and every exit goes somewhere. Retell: Logic Split	GREEN Successful transfer or completed outcome. The live call moved. Retell: Transfer Call · Ending	YELLOW Notification and follow-up. Information moves, the call does not. Retell: Function — webhook
RED Hard stops — legal, agency, mailer, DNC. These override everything. Retell: Global node · Ending	PURPLE Extract variable and data capture. Named fields, confirmed where required. Retell: Extract Dynamic Variables		

Arrows

- Solid arrow — Transfer Call. The audio path moves with it. Only five of these exist in the whole build.
- > Dashed arrow — Send Notification. A webhook fires, the caller stays with the AI or the call ends. Sabelli is only ever reached this way.

03 Call arrival and intent

A human gets three rings. After that Retell answers, discloses that it is an AI assistant and that the call is recorded, and then classifies the caller into one of fourteen categories before anything else happens.

The opening is not optional

A2 must disclose the AI assistant and the recording before any substantive conversation. No qualification question may be asked ahead of it. Final wording is **PENDING CONFIRMATION**.

04 Seller flow

Only categories 1 and 2 run the qualification conversation. Six captures, a lead record, an alert to Juan, then the transfer decision. The callback number is repeated back to the caller before `callback_confirmed` is set.

- The transfer cutoff time is `PENDING JUAN CONFIRMATION`. Do not build a value for it.
- The `Q3` qualification test uses the approved Twin Home Buyer rules; that rule set is `PENDING JUAN CONFIRMATION`.
- `S5` is built only if the property-condition field is approved for this build. Otherwise skip the node and leave `property_condition` null.
- `N1` fires on every completed seller intake, transfer or no transfer, so a seller is never captured without Juan being told.
- The AI makes no legal, financial or valuation statement anywhere in this branch.

95 Realtor and agent calls to Gen

Four short captures, then Gen. This is the branch that changed, so it is worth reading the exits carefully: both of them leave Gen as the owner.

Hard rules on the realtor branch

- ✓ Realtor and agent calls route to **GEN**.
- ✗ Not Mariaelena. That routing is retired.
- ✗ Not Sabelli — no transfer, and no normal realtor notification either.
- ✗ No edge of any kind runs from this branch to Sabelli.

06 Non-seller routing

On these calls the AI does not try to answer the question it is being asked. It takes a name, a number, one line of context, and routes.

“I’ll get this to the right person. Can I get your name and the best number?”

Peninsula Plumbing stays a plumbing call

A plumbing caller is never converted into a Twin Home Buyer seller lead during that call. A5 takes the plumbing message, N11 sends it to the plumbing intake, and the record lands in the plumbing log — not the seller pipeline. Whether a live transfer to a plumbing line is permitted is

PENDING CONFIRMATION

; until then plumbing calls are message-only.

07 Global hard stops

Four global nodes, live at every point in the conversation. A hard stop overrides the seller and non-seller flows the moment it triggers — mid-sentence, mid-capture, anywhere.

What the AI must not do on a mailer or legal call

- ✗ Explain the mailer.
- ✗ Defend the company.
- ✗ Confirm an allegation.
- ✗ Deny an allegation.
- ✗ Speculate, or improvise an answer.
- ✓ Capture the approved minimum, preserve the transcript, send N14 , end at T22 .

The Sabelli rule, stated once more

N14 is a notification. The call does not move. There is no *Transfer to Sabelli* node in this build and none may be added. Sabelli appears exactly once in the entire flow — as a review recipient on T22 .

Proposed hard-stop precedence, **PENDING JUAN CONFIRMATION** : G-DNC → G-LEGAL → G-MAILER → G-HUMAN → normal flow. If a caller both requests DNC and raises a legal or mailer matter, the proposal is to honour the DNC at T21 and send the T22 notification, recording both endings. Do not build the combination rule until it is confirmed.

08 Retell node map

The same flow expressed as Retell node types, so the build can be assembled in order without re-reading the diagrams.

FLOW NODE	RETELL NODE TYPE	PURPOSE	EXITS
A1	Inbound call trigger	Entry on a tracking number	V1
V1	Extract Dynamic Variables	source_channel, call_start_time, caller_id	Q1
Q1	Logic Split	Human answered within 3 rings	T1 · A2
A2	Conversation	Mandatory AI and recording disclosure	Q2
Q2	Logic Split — 14 way	Intent classification	V2
V2	Extract Dynamic Variables	caller_intent, intent_attempts	seller · realtor · non-seller · stops
S1-S6, SC1	Conversation + Extract	Seller qualification capture	next in sequence
F1	Function	Create or update the seller lead	N1
R1-R4	Conversation + Extract	Realtor capture	F2
F2	Function	Create the agent contact record	Q8
A3	Conversation	Non-seller simple intake	V3
V3	Extract Dynamic Variables	caller_name, callback_number, call_reason_line, call_type	Q10
A5	Conversation	Peninsula Plumbing intake only	N11
Q3-Q13	Logic Split	Routing and availability tests	per diagram

FLOW NODE	RETELL NODE TYPE	PURPOSE	EXITS
X1–X5	Transfer Call	Move the live call	ending or failure branch
N1–N14	Function — webhook	Send notification. No audio path	ending
G-LEGAL, G-MAILER, G-DNC, G-HUMAN	Global node	Interrupt from anywhere	HS1 · HS2 · Q13
HS1, HS2	Conversation	Constrained hard-stop scripts	V4 · V5
F3	Function	Preserve the transcript and recording	N14
T1–T26	Ending node	Terminal disposition	—

09 Conversation nodes

ID	NAME	NOTES
A1	Call arrives	Stores <code>source_channel</code>
A2	Mandatory AI opening	AI disclosure and recording disclosure before any substantive conversation. Approved Twin Home Buyer opening — <code>PENDING CONFIRMATION</code> of final wording
A3	Non-seller simple intake	“I’ll get this to the right person. Can I get your name and the best number?”
A5	Peninsula Plumbing intake	Plumbing only. Never converts to a seller lead
S1	Full name	Seller branch
S2	Property address and city	Street address and city
S3	Reason or motivation	Captured as said. No legal, financial or valuation statements from the AI
S4	Selling timeline	
S5	Property condition	Build only if the field is approved — <code>PENDING CONFIRMATION</code>
S6	Callback number	Number repeated back before <code>callback_confirmed</code> is set
SC1	Returning-seller confirmation	Confirms the name and property already on file, then joins <code>S6</code>
R1–R4	Realtor capture	Name, callback number, brokerage if offered, one-line reason
HS1	Hard-stop minimum capture	No explanation, defence, confirmation, denial or speculation
HS2	DNC acknowledgment	Approved wording — <code>PENDING CONFIRMATION</code>
F1	Create or update seller lead	Function node
F2	Create agent contact record	Function node
F3	Preserve transcript and recording	Function node, hard stops only

10 Decision nodes

ID	QUESTION	EXITS
Q1	Did a human answer within 3 rings?	YES → T1 · NO or after hours → A2

ID	QUESTION	EXITS
Q2	Which of the 14 caller intents?	14 exits
Q3	Qualifies for a live seller transfer?	YES → Q4 · NO → T5
Q4	Inside the approved transfer cutoff? PENDING JUAN CONFIRMATION	YES → X1 · NO → N3
Q5	Did Juan answer the warm transfer?	Answered → T2 · No answer → N2 · Failure → T25
Q6	New seller or returning seller?	T3 · T6
Q7	Intent clear after 2 attempts?	YES → Q2 · NO → G-HUMAN
Q8	Can Gen take the call now?	YES → X2 · NO → N4
Q9	Did Gen answer?	Answered → T9 · No answer → N4 · Failure → T25
Q10	Route on <code>call_type</code>	7 exits
Q11	Juan available — active contract or escrow?	YES → X3 · NO → N5
Q12	Juan available — title, escrow or lender?	YES → X4 · NO → N6
Q13	Approved human available now?	YES → X5 · NO → N12

11 Global nodes

Each of these is reachable from `A2` , `S1 – S6` , `SC1` , `R1 – R4` , `A3` and `A5` .

ID	TRIGGERS	ACTION	ENDING
G-LEGAL	Attorney, lawyer, lawsuit, subpoena, legal threat, regulator, investigator, government or consumer-protection agency	Stop qualification → <code>HS1</code>	T22
G-MAILER	Mailer, letter, check, postcard, “how did you get my address”, complaint about previous marketing correspondence	Stop qualification → <code>HS1</code>	T22
G-DNC	“Take me off your list”, “stop calling me”, “do not contact me”, or an equivalent request	Stop the conversation → <code>HS2</code> , set <code>dnc_requested = true</code>	T21
G-HUMAN	Explicit request for a human, hostile caller, or not understood after two attempts	Stop qualification → <code>Q13</code>	T23 / T24

12 Transfer Call nodes

Five nodes in the whole build move a live caller. None of them is Sabelli.

ID	DESTINATION	TRIGGER	SUCCESS	FAILURE
X1	Juan	Qualified seller inside the cutoff	T2	N2 → T3 / T6, or T25
X2	GEN	Realtor or real estate agent	T9	N4 → T10, or T25
X3	Juan	Active contract or escrow	T11	N5 → T12
X4	Juan	Title, escrow or lender	T13	N6 → T14
X5	On-call human PENDING CONFIRMATION	Human requested or hostile caller	T23	N12 → T24

An X6 transfer to a Peninsula Plumbing line is **PENDING CONFIRMATION**. Until a number is approved, plumbing calls take a message only and end at T19.

13 Notification nodes

Every node here sends information. Not one of them moves the call.

ID	RECIPIENT	CONTENT	FIRES WHEN
N1	Juan	New seller lead with every captured field	Every completed seller intake
N2	Juan	Seller callback follow-up task	Warm transfer not answered
N3	Juan	After-hours seller appointment or callback	Outside the transfer cutoff
N4	Gen	Realtor callback request — name, number, brokerage, reason	Gen unavailable or no answer
N5	Juan	Active deal message, time sensitive	Juan unavailable
N6	Juan	Title, escrow or lender message	Juan unavailable
N7	Past-client follow-up owner PENDING	Past-client message	Always
N8	Buyer / investor owner PENDING	Buyer or investor message	Always
N9	Vendor / subcontractor owner PENDING	Vendor message	Always
N10	Recruiting PENDING	Applicant name, number, role interest	Always
N11	Peninsula Plumbing intake	Plumbing message — plumbing log only	Always
N12	Human escalation queue	Hostile or human-requested callback	No human available
N13	Suppression process and compliance owner PENDING	DNC request	On G-DNC
N14	Juan + Sabelli	Sensitive legal, agency or mailer escalation with transcript and recording	On G-LEGAL or G-MAILER

N14 is the only notification Sabelli receives, and it is a review notification, not a transfer.

14 Extract variables

VARIABLE	CAPTURED AT	REQUIRED	NOTES
source_channel	V1	Yes	Tracking number the call arrived on
call_start_time	V1	Yes	Used by the cutoff test at Q4
caller_id	V1	Yes	Inbound number
human_answered	Q1	Yes	Drives T1
caller_intent	V2	Yes	One of the 14 categories
intent_attempts	V2	Yes	Two failures route to G-HUMAN
seller_name	S1 · SC1	Sellers	

VARIABLE	CAPTURED AT	REQUIRED	NOTES
property_address	S2 · SC1	Sellers	Street address
property_city	S2	Sellers	
seller_reason	S3	Sellers	Motivation, captured as the caller states it
seller_timeline	S4	Sellers	
property_condition	S5	Conditional	Only if the field is approved for this build
callback_number	S6 · R2 · V3	Yes	
callback_confirmed	S6 · R2	Yes	Set true only after the number is repeated back
caller_name	R1 · V3	Non-sellers	
caller_company	R3	Optional	Brokerage, only if naturally provided
call_reason_line	R4 · V3	Non-sellers	One line, no interpretation added
call_type	V3	Non-sellers	Routing key at Q10
transfer_attempted	X1-X5	System	
transfer_result	X1-X5	System	connected , no_answer , failed
dnc_requested	V5	On DNC	Set true , triggers suppression
hard_stop_type	V4	On hard stop	legal , agency , mailer
hard_stop_reference	V4	If offered	Mailer, letter, check or postcard reference
legal_party_name	V4	On legal stop	Attorney, firm or caller name
agency_name	V4	On agency stop	
transcript_id	F3	On hard stop	Preserved transcript and recording
hostile_flag	G-HUMAN	Conditional	
plumbing_issue_summary	A5	Plumbing	Plumbing log only
applicant_role_interest	A3	Applicants	

15 Ending nodes

Twenty-four endings. Every branch in every diagram lands on one of them, and each one names an owner.

ID	WHAT HAPPENED	OWNER	NOTIFICATION	TRANSFER	CRI
T1	Human answered within 3 rings	Whoever answered	NONE	N/A – HUMAN ANSWERED	Log me pro
T2	Qualified seller warm-transferred and connected	Juan	LEAD SUMMARY	YES → JUAN	Sel S1

ID	WHAT HAPPENED	OWNER	NOTIFICATION	TRANSFER	CRI
T3	Seller captured, Juan did not answer	Juan	N1 + N2	Attempted, not connected	Sel tr no
T4	Seller call outside the transfer cutoff	Juan	N1 + N3	NO	Sel hou
T5	Seller did not meet the live-transfer rules	Juan	N1	NO	Sel tr = f
T6	Returning seller, message taken	Juan	N1 + N2	Attempted or skipped	App exi
T9	Realtor / agent transferred to Gen and connected	Gen	CONTACT RECORD TO GEN	YES → GEN	Age the
T10	Realtor / agent — Gen unavailable	Gen	N4	No, or attempted and not connected	Age
T11	Active contract or escrow connected to Juan	Juan	MESSAGE SUMMARY	YES → JUAN	Att rec
T12	Active contract or escrow message taken	Juan	N5	Attempted, not connected	Att rec flag
T13	Title, escrow or lender connected to Juan	Juan	MESSAGE SUMMARY	YES → JUAN	Att rel
T14	Title, escrow or lender message taken	Juan	N6	Attempted, not connected	Att rel
T15	Past client message routed	Follow-up owner PENDING	N7	NO	Pas upc
T16	Buyer or investor message routed	Buyer-investor owner PENDING	N8	NO	Buy
T17	Vendor or subcontractor message routed	Internal owner PENDING	N9	NO	Ver
T18	Job applicant routed to recruiting	Recruiting PENDING	N10	NO	App

ID	WHAT HAPPENED	OWNER	NOTIFICATION	TRANSFER	CRI
T19	Peninsula Plumbing call handled as plumbing	Peninsula Plumbing	N11	No — transfer line PENDING	Plu Ne Buy
T20	Spam or wrong number	None	NONE	NO	Dis sp
T21	DNC honored	Compliance owner PENDING	N13	NO	dn tru acr list
T22	Legal, agency or mailer sensitive escalation	Juan	N14 → JUAN + SABELLI, WITH TRANSCRIPT	NO — AND NO TRANSFER TO SABELLI EXISTS	Re ma
T23	Human escalation connected	On-call human PENDING	CALL SUMMARY	YES → ON-CALL HUMAN	Cal
T24	Human escalation callback logged — includes unclear callers after two attempts	On-call human PENDING	N12	NO	Cal par
T25	Transfer failed technically — line or routing error	Intended destination and Juan	TO THE INTENDED OWNER AND JUAN	Attempted, failed	Ful tr fai
T26	Caller disconnected mid-flow	Depends on what was captured	ONLY IF SELLER, REALTOR OR HARD-STOP CONTENT WAS CAPTURED	NO	Par ca tru

How T26 is reached. T26 has no incoming edge in the diagrams, by design. It is wired to Retell's call-ended event on every conversation node, so a dropped call still lands on a named disposition instead of vanishing.

Retired: T7 and T8, the v1.0 realtor-to-Mariaelena endings. Do not rebuild them.

16 Pending confirmation

Nothing on this list may be built as a guess. Each item needs Juan's or Cherry's sign-off first, and each one names what it blocks.

#	ITEM	NEEDED FROM	BLOCKS
1	Seller transfer cutoff time and the after-hours boundary	Juan	Q4 · T4
2	Seller live-transfer qualification rules — what makes a seller transfer-worthy	Juan	Q3 · T5
3	Whether property condition is approved for this build	Juan	S5
4	Approved AI opening wording	Juan / Cherry	A2
5	Gen's transfer number and availability hours	Juan / Gen	X2 · Q8
6	Past-client follow-up owner	Juan	N7 · T15
7	Buyer / investor owner	Juan	N8 · T16
8	Vendor / subcontractor owner	Juan	N9 · T17
9	Recruiting notification recipient	Juan / Cherry	N10 · T18
10	Whether Peninsula Plumbing calls may be transferred to a plumbing line, or stay message-only	Juan	X6 · T19
11	On-call human destination and hours for escalation	Juan	X5 · Q13 · T23
12	DNC suppression administrator and confirmation window	Juan / Cherry	N13 · T21
13	Approved caller-facing wording for the hard-stop scripts and the T22 close	Juan / Cherry	HS1 · HS2 · T22
14	Hard-stop precedence and the DNC-plus-legal combination rule	Juan	Global layer
15	Callback SLAs	Juan	T3 · T10 · T12 · T24
16	Notification channel per recipient — SMS, email or CRM task	Juan	All N nodes
17	Name of the [CURRENT BUILDER] for the title block	Juan	Document header

Twin Home Buyer — Inbound Call Flowchart v2.0 · Supersedes v1.0 · Build / Retell implementation: [CURRENT BUILDER] · Approve: Juan · Gen is a transfer destination. Sabelli is a notification and review recipient.
