

## TWIN HOME BUYER

Phase 1 Seller  
Inbound Call Flow

## SCOPE

New Seller + Seller Callback only

## STATUS

For Cherry's review — not yet approved

## BUILD / RETELL

Rosanes

## APPROVAL

Cherry first, then Juan

## PHASE 1 SCOPE

Build and approve these two caller types first. Do NOT build the Realtor, legal, plumbing, buyer, vendor, applicant or other branches yet — they are later phases. The goal is to get this seller flow approved before the rest of the Retell system is built.

## TIMING PRINCIPLE

The Google Chat availability check runs at the same time as the AI conversation. Never build it as: notify → wait 30 seconds → check → continue. There must be no point where the caller hears silence waiting for Juan or Cherry.

## A CLAIM DOES NOT INTERRUPT THE CALL

mandatory — this is the rule most likely to be built wrong

If Juan or Cherry sends TRANSFER while the seller is talking, the AI must NOT transfer yet.

- ✗ Cut off the seller
- ✗ Interrupt mid-sentence
- ✗ Suddenly announce a transfer
- ✗ Abandon the question being answered
- ✗ Skip required information because somebody claimed

## CLAIM = PENDING TRANSFER

```
transfer_claim_status = claimed
```

```
transfer_target = Juan | Cherry
```

The AI keeps talking. The transfer waits for:

```
seller finishes → intake complete → natural break
```

## LEGEND

Conversation / Action

Extract Variables

Logic Split

Transfer Call

Function / Notify

Critical Rule

Ending

SOLID = live call moves (transfer)

DASHED = notification only, no transfer
